

◇
Versatile integration options
in Stürtz lines

◇
Cycle-time optimized integration
in the line structure

THE ADVANTAGES

- › With automatic sequence for one-sided longitudinal cuts on plastered PVC profiles
- › Saw from below or from above
- › Cut length: 2700 mm
- › Cut height: 30 mm
- › Profile end-stop at the level of the fitting groove for a well defined cut
- › Pneumatic horizontal and vertical profile tension
- › Automatic profile width adjustment
- › Automatic saw feed with profile end detection
- › Saw engine with exhaust dia. 100 mm
- › Support side Z-casement inside and T-casement outside
- › Mullion data must be provided by the customer in online interface, according to Stürtz record description
- › If fittings are to be preassembled, this requires a prior verification

TECHNICAL DATA

Component size	min. 320 x 320 mm	Profile depth	max. 100 mm
Component size	max. 1600 x 2600 mm (W x H)	Profile view width	min. 50 mm
Clear inside dimension	min. 180 mm	Profile view width	max. 120 mm
Profile depth	min. 50 mm
